**Course Description:**

The course deals with four main themes. The first theme embodies definitional aspects, characteristics, genesis and growth of International Relations. The basics of the actors of international politics are complemented with their role in understanding the political relations in the changing nature of International Relations. The second theme entails the ideas of national power followed by its functions and explores how the balance of power impacts on international politics. Moreover, it examines the role of collective actions sparked by the reign of terror espoused by some actors of International Relations which threatens the global peace and security. The third theme comprises the classical as well as contemporary theories of International Relations and their relevance in the modern political structure. It upholds the exquisite nature and orbit of the theories by reviewing political texts, policy analysis and strategy papers. The fourth theme offers avenues to accumulate knowledge on strategic spots, disputed islands, troubled territories and conflict-prone regions. It also analyzes how these

catalyze the contentions and conflicts and identifies the significance of subjects in the contexts of geopolitics. However, the course concludes with a discussion on the future direction of International Relations.

**Course Goals:**
