A Public University Supported by the Armed Forces

Mirpur Cantonment, Dhaka -1216

Website: www.bup.edu.bd

Department of Environmental Science

Faculty of Science and Technology (FST)

ADMISSION ON (EVENING PROGRAM)

Master in Environmental Science (Session: July 2017)

BUP invites application from potential candidates for Master in Environmental Science under the Faculty of Science and Technology (FST).

Overview and Prospect of the Degree

Environmental Science is comparatively a new discipline in country which suffering from lack of expertise. It is a much generalist degree, in the natural sciences. Focusing primarily on both the understanding of our natural and man-made environments, environmental science degrees draw from diverse fields of studies and require a strong background in the more traditional sciences: biology, physics, chemistry, geography, ecology, and even biotechnology. In addition, environmental science degrees also draw heavily from the social sciences, such as economics, business, or sociology. The degree to which any of these fields of study becomes prevalent within an environmental science education largely depends on the specialization one chooses. Due to the fact that environmental science is a generalist degree, students often complete specializations within a more select area, i.e. energy, sustainability, conservation etc. True to most science degrees, environmental science programs often require significant field work, lab work, or other data-oriented work. The Employers of environmental science graduates include:

- **Industrial sector (compliance)**
- **Local governmental authorities (Like LGED)**
- **Environment Agencies (EA)**
- **Department for Environment (DoE)**
- **environmental monitoring organizations**
- **environmental consultancies**

So better late than never! Start your carrier as an environmental; expert and contribute to countries dream to achieve SDGs.
